Important Information About Rare Coins

PLEASE READ

The invention and use of coins is attributed to the Lydians, a Greek nation, about 862 B. C., whose money was of gold and silver. The dating of coins was first adopted about the fifteenth century.

(For more information regarding the Ancient coins, see the photographic reproductions and explanations toward the end of this book. Read the Review of the Coinage of the World, in this book.)

The prices paid for rare coins are chiefly regulated by their state of preservation, the number of pieces issued of a certain date, and the demand for same. But neither the metal out of which the coin is made, nor the age, has anything to do with the prices paid.

The prices quoted in this book are the prices **WE PAY** for coins in good to proof condition (see "Conditions of Coins"), hence \$5.00 to \$10.00 means that we will pay anywhere between those prices, according to the condition of the coin.

NEVER CLEAN A RARE COIN. A somewhat corroded coin is oftentimes more valuable than a cleaned one. The cleaning of a rare coin considerably decreases its value.

The prices offered in this book are not of mere guesswork. The book was prepared with the greatest care as to accuracy; after years of close study of the values of rare coins, with the assistance of years of experience gained in the coin business.

HOW TO SEND COINS

Small lots of coins may be forwarded by registered mail. Large or valuable consignments should be sent by express. All coins, if purchased, are paid for the same day as received.

IMPORTANT:—When sending coins **ALWAYS** enclose return postage and **REGISTRATION** fee. We are not responsible for coins sent or returned by ordinary mail.

We devote our entire time to dealing in coins, and can serve you to your entire satisfaction, whether wishing to buy or sell.

Classification of the Condition of Coins

The state of preservation of coins are classified as follows:

"PROOF"

Proof coins are especially struck from polished blanks and dies and finished by hand, which gives them a mirror-like, smooth, reflective surface. The most perfect condition known. The mint makes a small charge for the proof coins, and they can only be had during the year of the issue.

"UNCIRCULATED"

Uncirculated coins are coins struck for circulation. But coins, to be classified as "uncirculated," must be as new and bright as when dropped from the coining press; a coin that has been in circulation, no matter whether it shows no marks of wear, cannot be classified as uncirculated.

"FINE"

Fine coins are those which have seen considerable circulation, but every feature of the coin must show plainly. It must not show any bad scratches or nicks.

"GOOD"

Good coins are those which have seen considerable circulation, but every feature of the coin must show plainly. It must not show any bad scratches or nicks.

"FAIR"

Fair coins are those which are much worn, but on which the design, lettering and date are clearly visible.

"POOR"

Poor coins are those on which the design, lettering and date are almost obliterated. Poor coins, unless of a very rare date, are worth their intrinsic value only.

"MUTILATED COINS"

Mutilated coins are those with holes, bad cuts or scratches, or otherwise damaged, and are worth their intrinsic or metal value only.

"OVER-DATES"

When a die, made in one year, is used in a later year, by engraving one figure over another, the piece struck therefrom is called an "over-date." For instance, the same die from which the Cents of 1810 were struck was used in 1811, by sinking a 1 over the 0, and portions of the latter figure are plainly visible.

COUNTERFEIT RARE COINS

Counterfeits of Rare Coins may be divided into the following classes:

RE-STRIKES

Re-strikes are pieces made from the original dies, but at a later period than the date on the coin. Among the American coins we find re-strikes of the dollar of 1804, and of the half-cents of 1831, 1836 and 1840 to 1849. The re-strikes, of course, do not command near the price of the originals. At present the dies are destroyed after the expiration of each year.

ALTERED DATES

Altered dates are original coins which have been altered or tooled from one date to another, and these may justly be classed as forgeries. The rarer dates of the American coins are at times tampered with; especially the dollars of 1801, which are altered to the 1804. But an altered date can easily be detected by the aid of a good magnifying glass.

ELECTROTYPES

The front and back of electrotypes coins are made separately and are then stuck together, and they may be easily recognized by the mark on edge showing where the two sides have been joined together. They are also of wrong weight. The electrotypes, as a rule, are not made to deceive the uninitiated, but are simply made as copies of very rare coins, where the original of the rare coin cannot be purchased. Electrotypes may generally be split in two with a strong knife.

CAST COINS

Casts, made from the original dies, are easily detected by their light weight or thickness. The lettering on cast coins is not as sharp as on struck coins, and the surface has a soft appearance, or else is covered with minute sand holes.

FORGERIES

Forgeries struck from false dies are mostly found of the rarer Colonial and U. S. pieces, also of rare ancient gold and silver coins. They are easily detected by anyone somewhat familiar with rare coins, as the weight of the forgeries is mostly incorrect, and the lettering and design are sharper than on the genuine.

THE TERMS USED TO DEFINE THE VARIOUS PARTS OF A COIN

The front or face of a coin is called the **Obverse**.

The principal object represented on a coin is called the **Type**.

The space between the type and the circumference is called the **Field**.

The lower portion of the area of a coin beneath the type, and separated from the rest of the field by a horizontal line, is called the **Exergue**.

Small objects represented either in the field or exergue as adjuncts to the main type are called **Symbols**.

Portions of a coin which are sunk below the level of the surface are said to be **Incuse**.

The hair of Liberty Head, when tied with a band, is called **Fillet Head**.

When the hair of Liberty Head is unconfined, it is termed the **Flowing Hair**.

The inscription on a coin is generally called the **Legend**.

When coins have inscriptions around the edge, they are called **Letter Edge**.

The **Milled Edge** refers to coins with edge like the U. S. silver coins of the present day.

Mint Marks are the small letters on coins denoting the place of mintage. The mint marks are found on the Reverse side of the coin. Coins made at the Philadelphia mint have no mint mark. For a complete list of the mints and the mint-marked coins, see "The U. S. Mint and Its Branches" in another part of this book.

THE MOTTO ON U. S. COINS

"In God We Trust."

Since the new 1907 issue of \$10.00 and \$20.00 gold pieces appeared many are of the belief that all U. S. coins without the motto command a premium. This is not true. The motto was not placed on coins till 1864; the two-cent piece being the first coin bearing the motto. So, of course, all U. S. coins prior to 1864 are without the motto.

The prices quoted herein on all U. S. Coins are for Philadelphia Mint coins, unless otherwise mentioned.

NOTE:—There are many counterfeit quarters and half-dollars of 1853. They are made out of the 1853 with arrows and with rays, simply by removing the arrow heads and rays. Some are made out of the 1858, by changing the 8 into a 3. But these counterfeits can not deceive anyone interested in coins, as they can easily be detected by their weight. The genuine 1853 quarters and half-dollars without rays and arrows weigh more than those with arrows.

PLATE 18

UTAH, OREGON AND COLORADO GOLD COINS

Private Issue of Gold Coins

The private or Pioneer coins, as they are sometimes called, were issued by private parties in the "Pioneer" days of the West and in the 30's in the Carolinas and Georgia. While not to be considered as legal coinage or legal tender, these pieces were accepted and passed current at a time when there was a pressing need of money with which to transact the business of the country. Such coinage is now prohibited by existing laws.

California Gold Coins

These coins were made as a substitute for the gold dust currency. The private firms making these coins were reputable, made their coins equivalent to and in some instances a trifle better than the regular United States gold coins. The following firms issued the coins and whose names appear on them: Augustus Humbert (United States Assayer), 1851 and 1852; Baldwin & Co., 1850 and 1851; Cincinnati Mining and Trading Co., 1849; Dubosq & Co., 1840; Dunbar & Co., 1851; Kellogg & Co., 1854 and 1855; F. D. Kohler, 1850; Massachusetts & California Co., 1849; Miners Bank, 1849; Norris, Griggs & Norris, 1849; Moffat & Co., 1849 to 1853; J. S. Ormsby & Co., 1849; Pacific Co., 1849; Templeton Reid, 1849; Shults & Co., 1851; Wass, Molitor & Co., 1852 and 1855.

UNITED STATES PATTERN COINS

Oregon Gold Coins

The issue of the Oregon gold coins was promoted by the same causes as in the other Western states—lack of convenient currency. After an unsuccessful attempt by the Provisional government to establish a mint, a private company—the Oregon Exchange Co., issued coins of the \$5.00 and \$10.00 denominations. The mint was erected at Oregon City; the necessary coining apparatus was made by a blacksmith.

WAR TOKENS

These tokens were issued by different parties during the Civil War. There are about 500 different varieties; they are the size of the small cent. None are very valuable. We pay \$1.50 per 100 pieces.

COMPOSITION SPIEL MARKS

These pieces were all made about the middle of last century and are somewhat in imitation of the U. S. \$2.50, \$5.00, \$10.00 and \$20.00 gold pieces and were originally issued as counters. They are of no value.

HARD TIMES TOKENS OR JACKSON CENTS

Issued in 1834 to 1841. There are about 150 varieties, all are about the size of the large copper cents; some were struck in brass. Their issue was prompted by the currency question, which was then a great political issue and all bear inscriptions politically significant. There are a few rare varieties, but the greater portion are common and for which we pay from \$2.50 to \$5.00 per 100 pieces.

The United States Mints

The U. S. coins were issued at six different mints: Philadelphia, New Orleans, San Francisco, Carson City, Dahlonega, and Charlotte. There are now four mints in operation: Philadelphia, New Orleans, San Francisco and Denver. The 1c and 5c coins are now coined at the Philadelphia, San Francisco and Denver mints.

MINT MARKS

Coins issued at the branch mints have a special mark denoting the place of mintage; they are small letters, as shown below, and are generally found on the reverse or "tail" side of the coin.

Old Uncurrent Bank Bills

(Broken Bank Bills)

1800 to 1876.

A great number of notes in various denominations were issued by Banks and Banking Institutions prior to the Creation of the National Banking System, and which have ceased to be current since that time. Many of these banks have lived but a short time, having either failed or gone into liquidation.

For the issues prior to 1837 we pay 3 cents to 7 cents per note; later issues, 50 cents to \$3.00 per 100 notes.

The alloy in silver coins of the United States is pure copper.

U. S. Mint Test for Gold and Silver

The following is a test for determining whether a coin is good or bad. Use liquids as near the edge of the coin as possible, as that is the part most worn. A drop of the preparation will have no effect on a genuine coin, while it can be plainly seen on counterfeits. Heavily plated coins should be scraped slightly before testing.

Test for Gold.

Strong Nitric Acid, $6\frac{1}{2}$ drachms.
Mur. Acid, $\frac{1}{4}$ drachm, or 15 drops.
Water, 5 drachms.

Test for Silver.

24 Grains of Nitrate of Silver.
30 Drops of Nitric Acid.
Water, 1 ounce.

The above test should conform with diameter, thickness and weight, the test used at the mint.

PAPER MONEY

UNITED STATES FRACTIONAL CURRENCY

Immediately after specie payments were suspended in the early part of 1862, when gold and silver coins disappeared from circulation, the place of subsidiary silver coins was for a time supplied by tickets, due bills and other forms of private obligations, which were issued by merchants and corporations. Congress soon authorized the use of postage stamps for change and then a modified form of postage stamps called postage currency and finally fractional currency in denominations corresponding to the subsidiary silver coins. There is over \$15,000,000 worth of this fractional currency still outstanding, about half of which is officially estimated to have been destroyed.
